

The Leader's Challenge

Transforming Leaders

Proven over many years to transform leaders nationwide, ***The Leader's Challenge*** will dramatically enhance your personal and professional performance.

Presented in a workshop setting of no more than 15 participants, ***The Leader's Challenge*** integrates the didactic method of instruction with preliminary online assessment (internationally acclaimed ***MyHardWired***[®]) and class preparation to enable the class to enter the course of learning equipped to succeed.

HERE'S WHAT YOU WILL ACCOMPLISH?

I. Discover the leader in you!

*Using the internationally acclaimed ***MyHardWired***[®] personal profile you will discover the leadership behaviors that make you who you are.*

II. Develop a Personal Leadership Philosophy

Create a living document in which you describe your personal philosophy on leadership. Understanding how you lead and sharing that with those you lead changes everything!

III. Communications

Learn effective communication skills and apply them in your leadership style. Your message to others and the personal behaviors that affect communicating will be uncovered for you to apply.

IV. Resolving Conflict

A constant challenge for leaders. Understand the sources of conflict and the five key strategies in resolving differences.

V. Motivation

Getting to know and understand those whom you serve as their leader is paramount to effective leadership. Relationships and applying them in the workplace will dramatically enhance the leader's overall impact and the performance of the organization.

VI. Productivity

Establish a game plan for effectively managing your life. Understand and incorporate "high payoff activities" in everything you do.

VII. Time Management

The lynch pin in productive leading. Discover proven methods for managing not only your day, but the activities of those you lead.

VIII. Goal Setting

In business, just as in leadership transformation... "the bottom line is the bottom line." Using the S.M.A.R.T. format and incorporating goals at every level of an organization (and your personal life), the final session in the workshop sets the stage for proven results.
